BUREAU OF STATISTICS

1989 - 1999

1999 Figures *(adjusted for inflation*)*

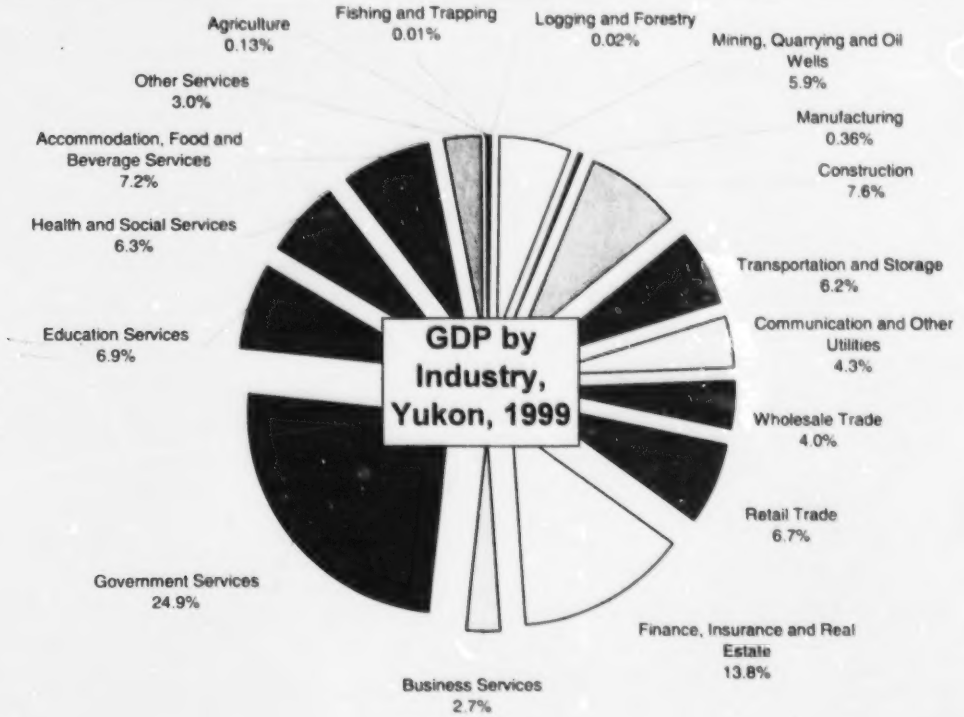
■ Total for all business sector industries	$558,100,000
■ Total for all non-business sector industries	$412,400,000
■ Total for all goods producing industries	$157,100,000
■ Total for all service producing industries	$813,400,000
■ Total GDP	$970,500,000

(* these figures have been stated in dollars from the reference year 1992 in order to take inflation into account.)

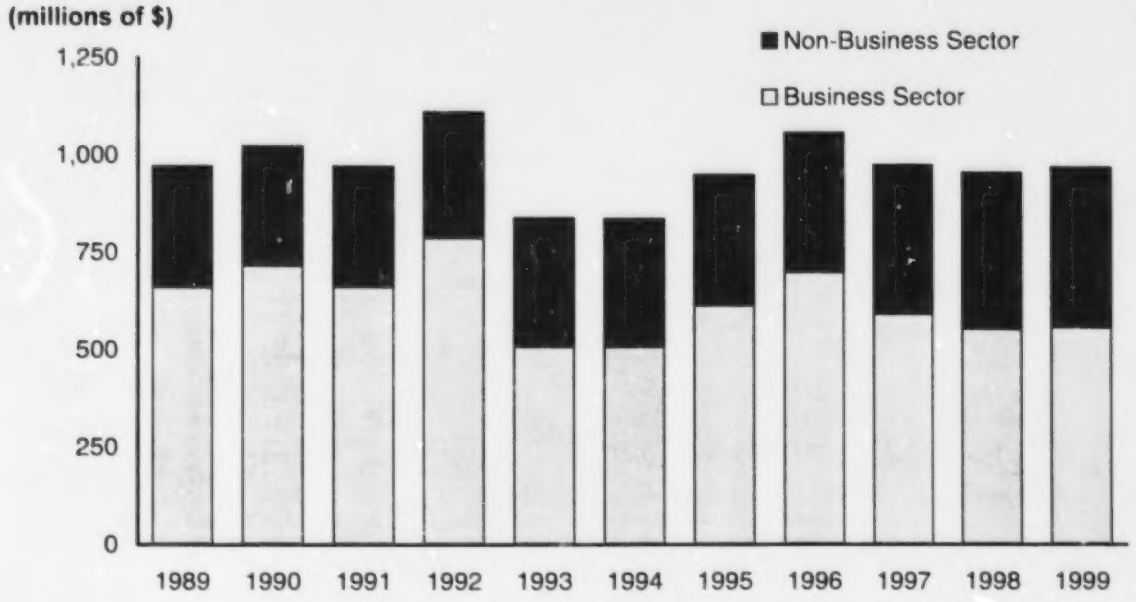
1999 Highlights

The Yukon economy increased in 1999 by 1.6%, following a decline of 2.0% in 1998 and a decline of 7.8% in 1997. The GDP increased by 11.4% in 1996 and 13.3% in 1995 after decreasing 0.2% in 1994. The 1999 GDP is now 0.3% above the 1989 level, after adjusting for inflation.

Overall, the economic production of industries in the business (for-profit) sector increased 0.8% in 1999, while the non-business sector increased 2.7%. The GDP in goods producing industries fell 4.7% while the GDP in service producing industries rose 2.9%.



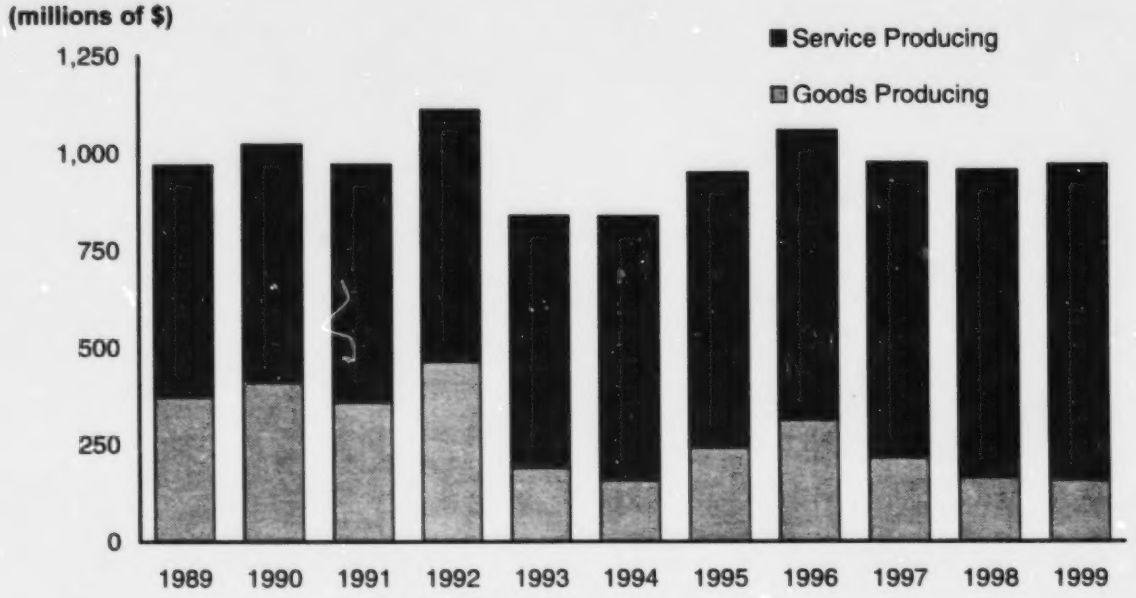
Real Gross Domestic Product of Business and Non-Business Sector Industries (in constant 1992 dollars)



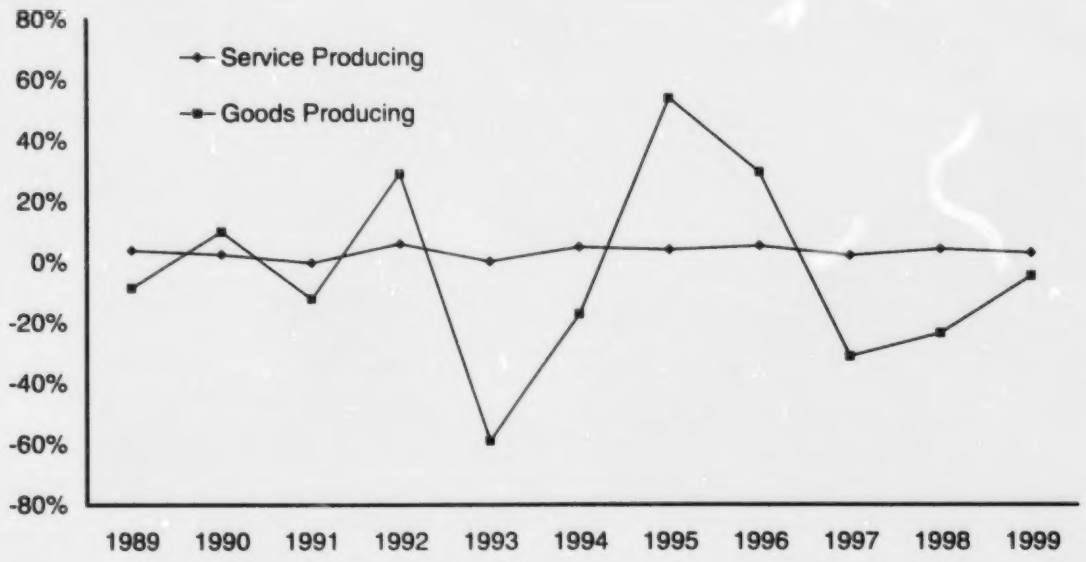
Real Growth Rates (%) of Business and Non-Business Sector Industries (in constant 1992 dollars)

Note: Business Sector Industries: agriculture; fishing and trapping; logging; mining, quarrying, oil wells; construction; transportation and storage; communication; other utility industries; wholesale trade; retail trade; finance, insurance and real estate; community, business and personal services.
Non-Business Sector Industries: government services; community and personal services; all other non-business sector services.

Real Gross Domestic product of Goods Producing and Service Producing Industries (in constant 1992 dollars)



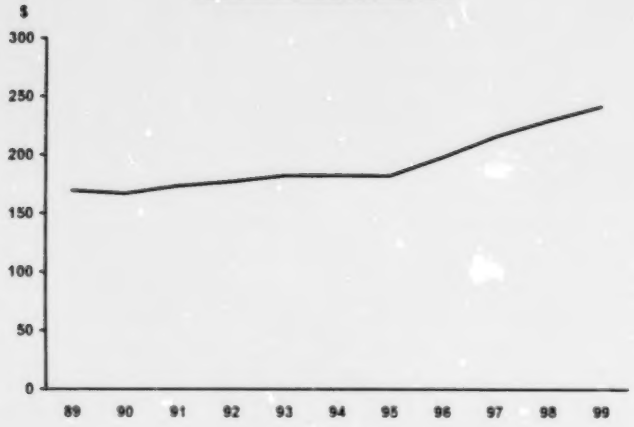
Real Growth Rates (%) of Goods Producing and Service Producing Industries (in constant 1992 dollars)



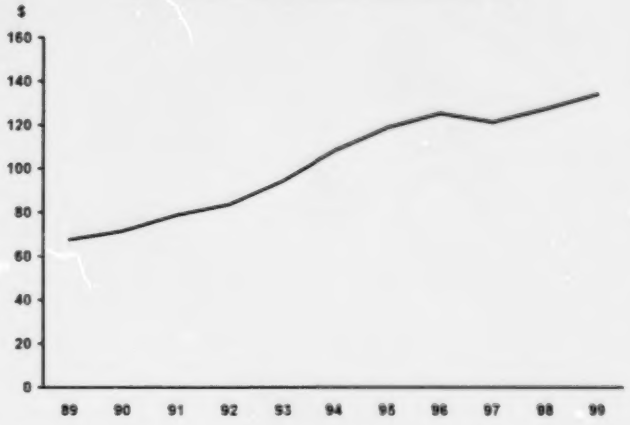
Note: Goods-producing Industries: agriculture; fishing and trapping; logging; mining, quarrying, oil wells; construction; other utility industries.
Service-producing Industries: transportation and storage; communication; wholesale trade; retail trade; finance, insurance, real estate; community, business and personal services; government services; all other business and non-business sector service industries.

Real Gross Domestic Product of Yukon's Largest Industries
(in millions of constant 1992 dollars)

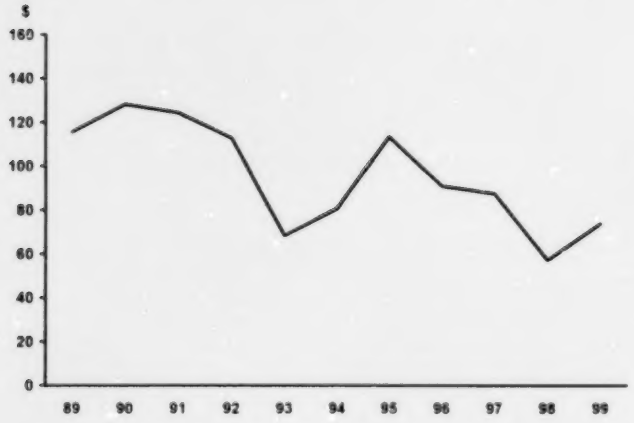
1 Government Services



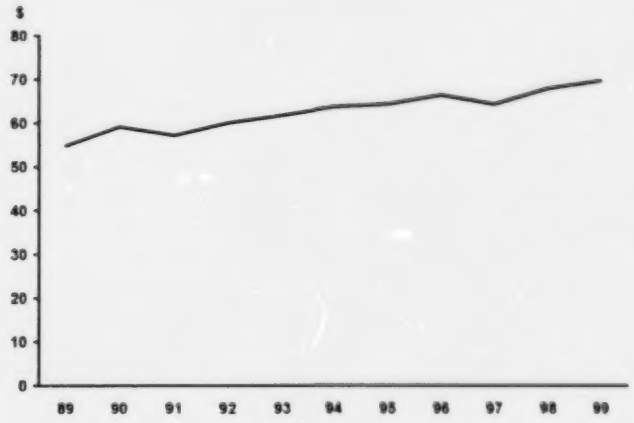
2 Finance, Insurance and Real Estate



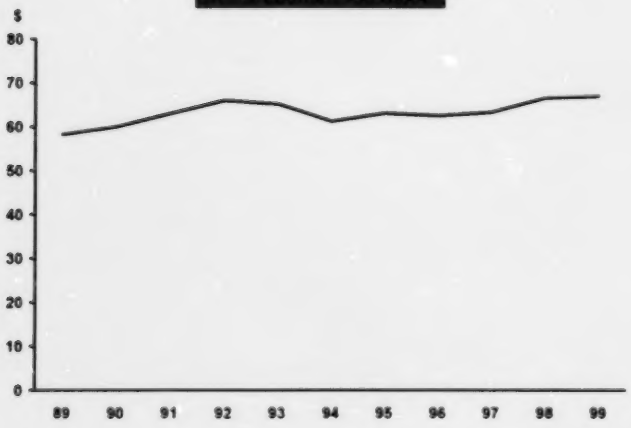
3 Construction



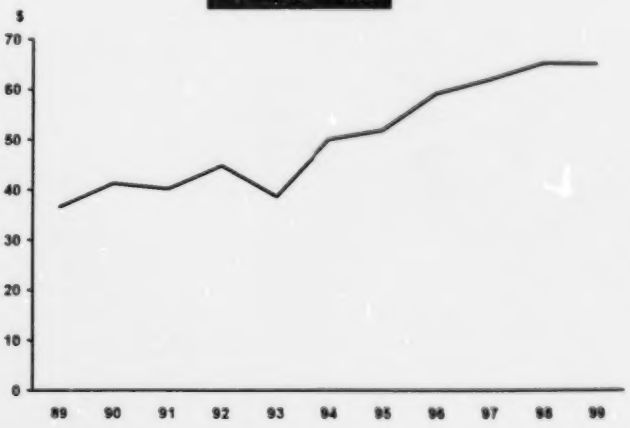
4 Accommodation, Food and Beverage



5 Education Services



6 Retail Trade



Note: Scales vary for each chart.

Year to Year Real Growth Rate (%), All Industries, 1989 - 1999

This analytical report presents Statistics Canada's latest estimates of Yukon's Gross Domestic Product (GDP) by industry for the years 1989-1999. The GDP by industry data are presented in constant (inflation-adjusted) dollars for 1989-1999 and current dollars (these figures have not been adjusted for inflation) for 1988-1997. The constant dollar estimates for the years 1996, 1997, 1998 and 1999 should be considered preliminary and subject to revision.

The estimates contained in this publication are produced by Statistics Canada's Industry Measures and Analysis Division and are not fully reconciled with the overall provincial/territorial GDP figures produced by Statistics Canada's National Accounts and Environment Division. While the general concepts followed in compiling these estimates are consistent with those underlying the Provincial/Territorial Income and Expenditure Accounts, there still remain some statistical differences between the two sets of estimates. Statistics Canada continues to give priority to statistical integration and a narrowing of the differences.

Note on the definition of the Government Services Industry:

Economic units (companies or establishments) are classified together in the same industry if they are engaged in the same or a similar kind of economic activity. The industrial grouping does not depend upon whether the activity is carried on by a government agency or by a business enterprise. Because so much of the activity commonly understood as "government" is re-allocated and assigned to its related industrial group in the industrial distribution, the "Government Services" industry shown in these tables provides a limited view of the full range of government activity. It includes only those establishments of government which clearly do not belong to any other branch of economic activity, but which are essentially concerned with general administration, the internal service agencies of the public sector, and defense.

Methodological Note: For most industries, data from 1989 to 1995 were estimated using a complete value-added approach, that is, by subtracting intermediate inputs from gross outputs. Because data on inputs are scarce for the last four years (1996-99), real value added has been projected on the basis of movement in related indicators such as output or employment.
